Introduction : Woodees

Live edge furniture markets a range of architectural wood products, specializing in custom-cut products specially in live Edge furniture and other Wooden Furniture for high-end residential, commercial, institutional and resort applications.

Our business focused on achieving greatness with our customers domestically and also world wide to build properties of extraordinary distinction, whose owners will enjoy them for generations to come.

Live edge furniture exudes rich natural colors, textures, and beautiful craftsmanship. Our skilled designers and carpenters incorporate the natural edge of the wood into the design of the piece, whether a table, desk, bench, coffee table or another custom item. Live edge allows you to create a warm vibe that only natural wood in its natural free contoured state can bring. Every piece is unique, chemically treated and Kiln Dried (to maintain moisture further enhancing its life)

Beyond the artistic beauty that live edge furniture provides, one of the most attractive things about it is its sustainability. In much of the live edge furniture being created, the wood used is often sourced locally from fallen trees through Government Auctions.
